

Rajasvi Décor CRM – New Requirements & Enhancements

Discussion Date: 17-09-2026

Discussion With: Hemant Sir

1. Daily Management Report

- A daily summarized report should be sent to Management through email.
- The report should include:
 - Leads received/created
 - Calling activity
 - Follow-ups
 - Lead status/progress
 - Sales/converted leads
 - Sample sales / sample invoices
 - Other relevant daily CRM activities

2. Sample Invoice / Sales Tracking

- When a customer requirement is received, a sample invoice or sample sale may be created.
- This activity should be recorded against the respective lead.
- Lead progress should follow the flow: **Lead → Requirement → Sample Invoice/Sale → Follow-up → Sale/Conversion.**
- Sample invoice/sale and final conversion details should be available in the Management report.

3. Kommuno IVR / Calling Integration

- Integrate the CRM with the **Kommuno IVR calling system.**
- Calling activity and call reports should be available against the respective leads.
- Calling data should also be considered in daily reporting.

4. WhatsApp Integration

- WhatsApp should be integrated with the CRM.
- Relevant customer communication/activity should be linked with the respective lead.
- WhatsApp activity should be available for tracking/reporting.

5. Consolidated Reporting

The CRM should provide a consolidated view of:

- Lead activities
- Calling/Kommuno IVR
- Follow-ups
- WhatsApp communication
- Sample invoices/sales
- Converted sales

This will reduce manual reporting and improve Management visibility.

6. Admin – Lead Status Permission

- Currently, Admin cannot update the lead status.
- Admin should be given permission to:
 - View the lead status
 - Update/change the status
 - Save the updated status
- The updated status should reflect in lead tracking and reports.
- Existing lead status values/workflow will remain unchanged unless separately modified.

Expected Outcome

These enhancements will provide better visibility of **leads, calls, follow-ups, WhatsApp communication, sample sales/invoices, conversions, and daily performance**, while reducing manual reporting work.
